Description of Invention: Please preserve all records of the invention and attach additional pages for the following. Each additional page should be signed and dated by the inventor(s) and witness(es).

A. Description of the construction and operation of the invention (include appropriate schematic, block, & timing diagrams; drawings; samples; graphs; flowcharts; computer listings; test results; etc.)

When scanning to host or digitally sending the user would access the functionality through the control panel. Within the menu structure of the MFP or Digital Sender control panel there would be a menu option for scanning to email, scanning to host or sending a fax that would allow the user to access email addresses, urls, host addresses and phone numbers from their PDA or Laptop wirelessly (with Bluetooth or FIR or alternatively even by directly connecting to the MFP). The user would have the option of accessing individual addresses as well as address lists. These addresses, urls, etc. would optionally be able to be transferred to and stored in (or appended to) the MFP or Digital Sender's address book.

C. Problems solved by the invention.

Allows the user access to their personal addresses (and phone numbers, etc.) when Digital sending, scanning to host and faxing.

B. Advantages of the invention over what has been done before.

Saves the user time and reduces errors in address entry.

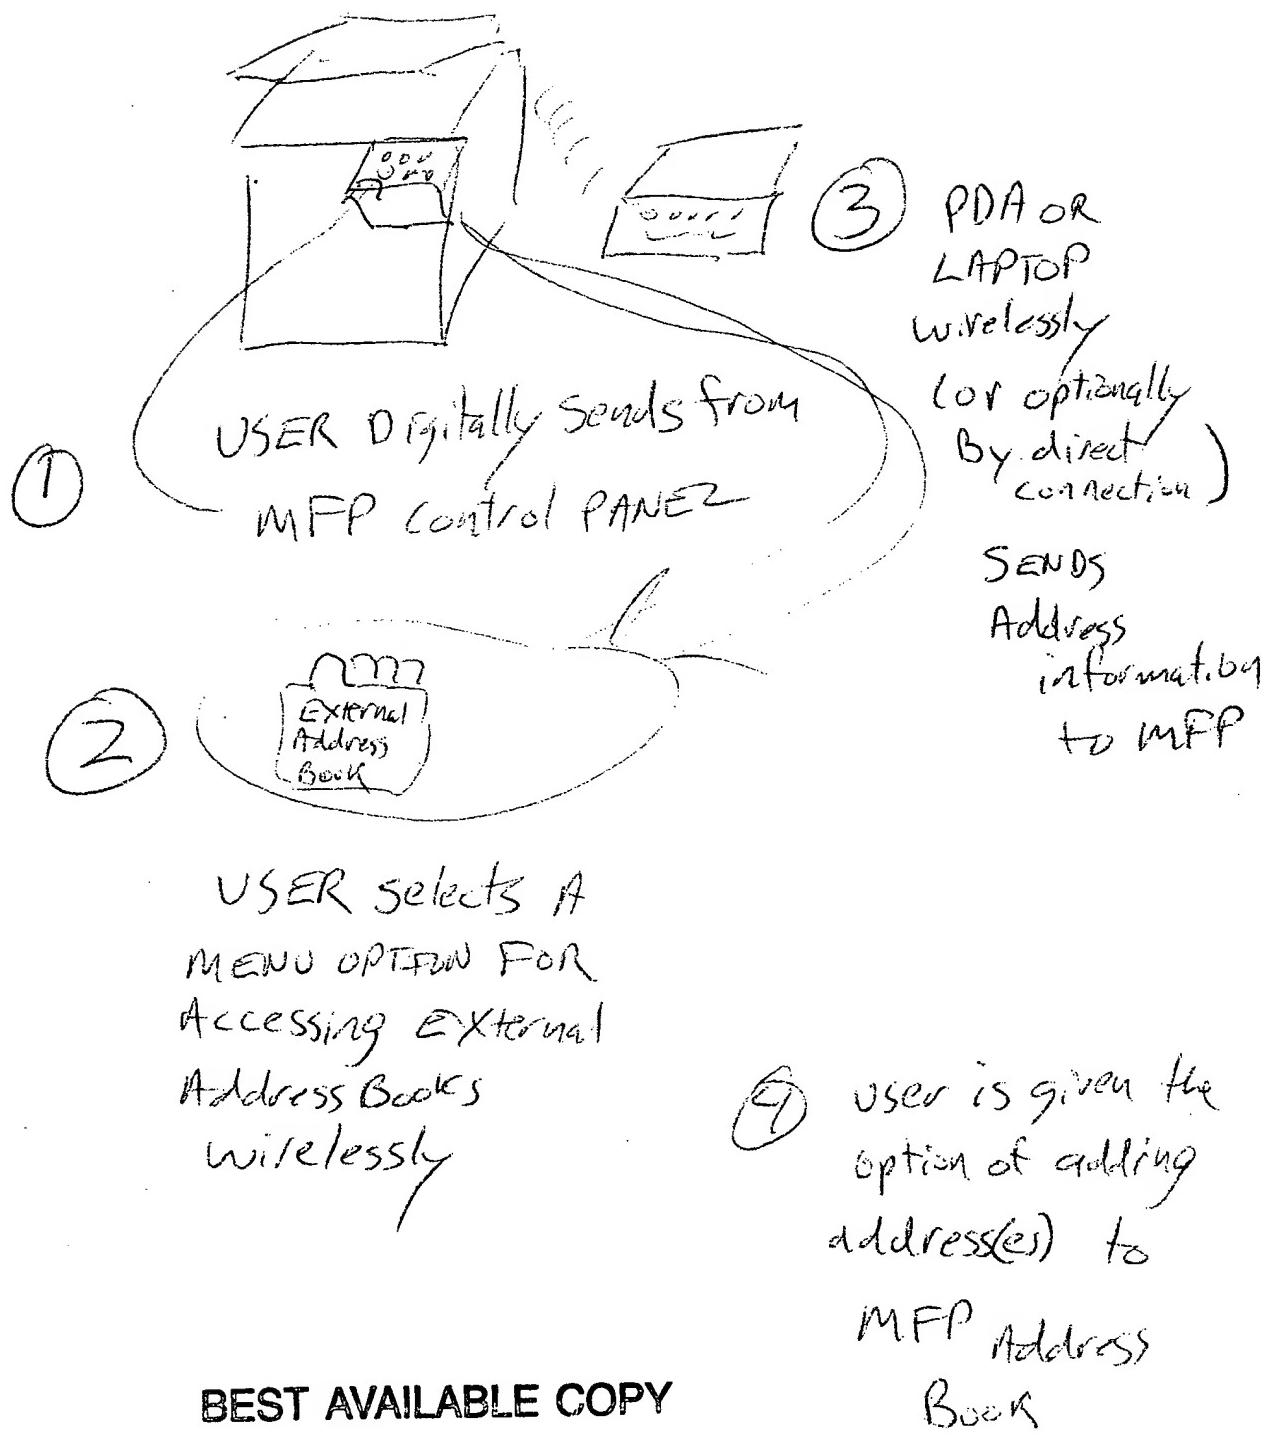

D. Prior solutions and their disadvantages (if available, attach copies of product literature, technical articles, patents, etc.).

Typing in addresses that cannot be accessed from the MFP/Digital Sender Address Book

Time consuming, tedious and error prone. Addresses typed in may also get appended to the MFP's address book when the user does not want them stored for others' access.

Dear Sir/Madam:

This Declaration is submitted in support of the Declaration of Prior Invention Under 37 C.F.R. 1.131 submitted to establish conception of the subject matter of the present patent application prior to the effective reference date of March 30, 2001 of Rhoads U.S. Patent Publication 2002/0142765 coupled with due diligence from prior to the effective reference date to the filing date of June 21, 2001 of the present patent application (i.e., constructive reduction to practice) and prior to the effective reference date of March 5, 2001 of Besprosvan U.S. Patent Publication 2002/0124057 coupled with due diligence from prior to the effective reference date to the filing date of June 21, 2001 of the present patent application (i.e., constructive reduction to practice).

The persons making this Declaration are patent attorneys Steven E. Dicke and Paul S. Grunzweig of Dicke, Billig & Czaja. We state as follows:

On or after October 17, 2000, Steven E. Dicke received a letter enclosing HP Invention Disclosure No. 10006174-1 and an Engagement Agreement from HP Patent Attorney-Outsourcing Manager Steven R. Ormiston (see Attachment 1 – 2 pages, which includes a later executed copy of the Engagement Agreement). Upon receiving this invention disclosure, it was placed in a queue of other patent applications to be prepared on behalf of HP.

During the period between approximately October 2000 and March 2001, we had a reasonable backlog of unrelated cases on which we worked reasonably hard and carried out expeditiously. Our practice was to attend to the preparation of patent applications having bar

dates first and attend to the preparation of the remaining patent applications (including the present patent application) generally in the chronological order in which they were received.

On January 10, 2001, Steven E. Dicke, through his legal assistant Lisa Johnson, prepared and sent a letter to patent attorney Paul S. Grunzweig requesting that he prepare a patent application based on this disclosure (see Attachment 2).

Attachment 3 is a copy of billing invoice detailing activities of patent attorneys Paul S. Grunzweig and Steven E. Dicke for preparation of the present patent application, covering a time period extending throughout March 2001. During March, 2001, Paul S. Grunzweig reviewed the information from and discussed the invention disclosure with the inventor Robert Seseck and drafted and prepared the present patent application (see Attachment 3).

Preparation of the present patent application also occurred generally during the same time period through March 2001 to June 2001 as preparation of a patent application for Invention Disclosure 10005647, as was requested by Steven Ormiston (see Attachment 1, "Additional Terms or Instructions: Coordinate with 10005647") and which was later filed concurrently with the present patent application.

IT IS READY FOR HP LEGAL REVIEW OF THE CLAIMS.

SORRY ABOUT THE FANCY HANDMADE COVER SHEET
BUT I SENT THIS FROM HOME SO IT WOULD HAVE TO DO.

BEST REGARDS, BOB SESEK

I'M SURE THAT WILL BE A
HUGE USECASE!

P.S. NICE TOUCH ADDING IN MY WOODCARVING COMMENT

I do not have your most recent version of the application for this file. So, please prepare this application for review by HP Attorneys, with the following changes. I don't need to see it again. Thanks Paul G

On page 6, line 19, please replace "FIR" with "FiR"
On page 7, line 5, please insert "40" after electronic document receiver so that sentence reads "and/or electronic document receiver 40 via direct communication links 94"

Thanks.

Steve,

Please add a computer product claim set that mimics the more broad method claims (because, I suspect, if this were ever implemented, it would be implemented in software or firmware running on conventional processors in PDAs, digital senders, MFP etc.). Thanks. Steve Ormiston.
